SUMMARY

Full-stack engineer with 15+ years building and leading production web applications. Long-time open-source contributor and maintainer of several widely used Laravel packages, plus ongoing core work on platforms deployed worldwide. I usually own the full cycle, covering architecture, APIs, database design, testing, deployment and production support. I have worked with North American and European clients throughout, and led engineering teams since 2017.

SKILLS

Backend: PHP, Laravel, Symfony, Node.js, Ruby on Rails, REST APIs

Frontend: Vue.js, JavaScript, React, Tailwind CSS, Bootstrap, responsive UI & UX

Database: MySQL, MariaDB, PostgreSQL, SQLite, Redis

Testing: PHPUnit, Pest PHP, Cypress (E2E), TDD, automated test suites, code review

AI Tooling: Claude, Grok, GitHub Copilot (daily use for development and code review)

Cloud & DevOps: AWS, DigitalOcean, GCP, Docker, Linux, Git & GitHub, CI/CD, deployment

EXPERIENCE

Backend Software Developer — Core Contributor

Apr 2022 – Present

[Public Knowledge Project \(PKP\)](#) · Simon Fraser University · Burnaby, B.C., Canada (Remote)

- Core developer on **Open Journal Systems (OJS)** — the world's most widely used open-source scholarly publishing platform, running 58,000+ journals across 156 countries — alongside Open Monograph Press (OMP) and Open Preprint Systems (OPS).
- Ranked among the [top 10 contributors](#) to the PKP codebase, with sustained work across the core application, data layer and APIs.
- Modernized core infrastructure by introducing Laravel Eloquent, moving core and plugin API routing onto Laravel routing, building the queue and scheduler systems, and integrating the Blade templating engine.
- Contributed to enhancements in the author submission, review and publication processes used across the editorial workflow.
- Code review of community and core members' pull requests, support for external contributors, and maintenance of coding standards and automated testing in a fully distributed open-source team.

Lead Architect & Developer

Apr 2023 – Present

[Dentall Manager](#) · Netherlands (Remote)

- Lead the architecture and development of a multi-tenant SaaS ERP platform now serving **50+ dental and medical clinics** across the Netherlands (Laravel, Vue, Node).
- Tech lead for a **team of 8 engineers**. Designed the tenancy model, RBAC and core domain modules for clinic operations and billing.
- Manage and own the full technical stack, from system design and database schema to REST APIs, deployment and production support, on a platform handling **patient data under GDPR**.

Team Lead & Manager

Jan 2020 – Apr 2022

[Developer Squad](#) · New York, USA (Remote)

- Led a 10–12 person engineering team and owned delivery for client platforms generating close to **US\$500K per month** in combined revenue, including mitragaia.com.
- Managed client relationships, scoping and planning from first requirement through to release, acting as the main technical point of contact.
- Set technical direction and code-review standards, and mentored developers across both client and internal projects.

Software Engineer → Tech Team Lead & Manager

Sep 2011 – Nov 2019

Noobis, Inc. · Buffalo, New York, USA

Promoted through Software Engineer (2011–2015), Senior Software Engineer (2015–2017) and Tech Team Lead & Manager (2017–2019).

- Led the entire tech team of 10–12 engineers and managed the development flow of the company's flagship SaaS products.
- Managed delivery of **80+ client projects** across web and mobile, from scoping through to release.
- Introduced agile practices, built and led the backend/API team, and originated new in-house product ideas.

KEY ACHIEVEMENTS

- **Open source:** top-10 contributor to PKP's OJS, OMP and OPS. Also maintain [15 Laravel packages on Packagist](#) (195k+ combined installs); laravel-model-sanitize was [featured on Laravel News](#).
- Have led engineering teams of up to 12 people since 2017 across three organizations, delivering 80+ client projects from scoping through release.
- Designed multi-tenant SaaS and ERP platforms from the ground up, including the one now used by 50+ clinics in the Netherlands.
- Shipped and supported production applications on Laravel, Vue, Rails and React, from greenfield builds to performance work and long-term maintenance.

NOTABLE PROJECTS

- [OJS / OMP / OPS](#) (PHP, Laravel, Vue; open source, via pkp-lib)
- [dentallmanager.nl](#) (Laravel, Vue, Node)
- [mitragaia.com](#) (WordPress ecommerce)
- [serlockintegrated.com](#) (Laravel, Vue)
- [lawmaker.io](#) (Ruby on Rails)
- [buffalocitymission.org](#) (Laravel, WordPress)

EDUCATION

Bachelor of Science in Computer Science & Engineering

Feb 2007 – Jul 2011

Rajshahi University of Engineering & Technology (RUET), Bangladesh

Certification Certified Laravel Developer

LANGUAGES

English — Professional working proficiency **Bengali** — Native
